

OUR MISSION

at Vessco is to provide the highest level of quality and service to the municipal and industrial customers we serve with our Total Solution approach. This includes initial project consultation, design partnering, installation assistance, field service and parts delivery.

EXCEPTIONAL SERVICE

Vessco was founded as a service company, and this remains at the core of what we do. Our Total Solution offers an innovative cost-modeling strategy which determines not only your initial costs, but your projected costs over the life-cycle of the equipment coupled with ongoing customer support. This gives our customers a partner for life and we're here to support you every step of the way!

Facilities & Service

Vessco's Minnesota headquarters offers 18,000 square feet of service and support

- Expert In-Field Service Technicians and a team of Project Managers all offering elevated customer service
